What is a Forex Chart, and how do you use it in Forex Trading? Forex trading involves the sale of a currency, and the simultaneous purchase of another with the purpose of closing the position at a later time with a profit.. If we did not make use of an analytical tool such as a forex chart to place the data into a more compact form where it can be visually examined and analyzed, we would be in possession of a vast sea of difficult to interpret numbers.. The forex trading chart, then, is a visual aid that makes the recognition of trends, and patterns in general easier, and makes the application of technical tools of analysis at all possible.
